TO WHOM IT MAY CONCERN

**TESTIMONIAL ON TAN KEE XIANG
(NRIC: T0105231J)**

Tan Kee Xiang was attached to the Ministry of Home Affairs (MHA) as a Data Science intern from 13 May to 31 Dec 2025.

During his internship, Kee Xiang developed an LLM (Large Language Model)-based processing pipeline to extract entities and relationships from unstructured Cyber Threat Intelligence (CTI) data which would aid in efficient knowledge management and investigations. He also fine-tuned LLMs for cybersecurity-specific use cases, achieving notable performance improvements. Additionally, he enhanced geospatial algorithms for large-scale dataset processing in Apache Spark.

Kee Xiang quickly acquired and applied domain knowledge across related fields, despite limited prior exposure to cybersecurity or network systems. He demonstrated a strong work ethic, proactively sought feedback, clarified uncertainties, and independently researched optimised solutions.

Kee Xiang is a highly motivated, self-driven individual with exceptional cross-disciplinary learning agility. His perseverance, positivity, and technical initiative would make him a valuable contributor in an organisation.

We wish him all the best for his future endeavours.

Yours faithfully,

BELINDA MAK
DIRECTOR (PEOPLE DEVELOPMENT)
